

HULBEE

Enterprise Search

Version 3.0

 Made in Switzerland

Ideal search engine for any company

Ideal search engine for any company.

Finally recovering and using that which was lost!

Finds. Everything. Safely.

Our world-leading enterprise search retrieves lost information! For years, information has accumulated as knowledge in your company, but you cannot use it because this information cannot be found! With Hulbee Enterprise Search, all information, whether on the Intranet or Internet, in any file structure or in archives can be found. Numerous connectors ensure that you can find your valuable information in the most popular software applications such as SharePoint, Exchange, Dropbox and many more!

Whether document search

With Hulbee Enterprise Search, you can search across all areas of your organization, whether it's a normal file structure, storage, cross-regional, or typical solutions like SharePoint, Exchange, or Apple's environment. Everything can be indexed and the staff can finally breathe and find everything. "I have not found it" is therefore a thing of the past.

Or web search

Many companies require the search not only for internal documents or information, but also for the web search or intranet. Large companies, authorities, press portals or eCommerce providers in particular need a smart search for online contents, even if these contents are stored in PDF format. With Hulbee Enterprise Search you have the advantage as a company!

The most secure platform for information search in your company.

Full security and flexibility!

We provide you with an enterprise search software that you can install in your company on your own servers and under your own direction, ensuring the full security of your data! We offer you every flexibility and the possibility to start Enterprise Search also under every virtual machine. Also, the search is cloud-ready and can run on your own cloud solution.

Top technologies at your service!

For over 16 years, we have been researching and developing information processing and search. Today you and your company can profit from it! Our technology is not only focused on simple search, but also combines information analysis and document management. Many technologies such as artificial intelligence and semantic search are at your service!

The next-generation enterprise search!

Hulbee Enterprise Search convinces customers around the world with advanced performance and innovation.

Simple integration. Fair price. Secure.

Hulbee Enterprise Search not only provides a simple search software, but also consolidates our experience and knowledge, which has been accumulated for over 17 years and combines intelligent search, format diversity, different corporate infrastructures, security, etc. in areas such as document management.

Our goal is to create a timely software technology for you that meets all security requirements. We would be very pleased if you test our software. Request a Proof of Concept.

Our software complements existing software products from other manufacturers such as SharePoint, Exchange, DMS etc. through the innovation of the search. It is thus not a competition, but an addition to and completion of the optimal search in the company.

In just three steps, you'll get to your perfect search:

Request a Proof of Concept from us

As soon as you have requested the Proof of Concept, you will receive a questionnaire with which we will compile the test version.

Install the test version

After the installation you have the opportunity to test the software for one month, according to your own needs!

From a convincing test to your own software

After extensive testing internally and with the conviction of not buying a pig in a poke, you acquire the Hulbee Enterprise Search.

The most popular features at a glance:

We offer you enterprise search software, which you can install in your company on your own servers and under your own direction, ensuring the full security of your data! We offer you every flexibility and the possibility to start the enterprise search on any of the virtual machines. In addition, the search is cloud ready and can run on your own cloud solution.

GUARANTEED SECURITY OF ALL DATA 100%

Security plays a very important role for us, therefore we take the safest precaution in the distribution of rights: Active Directory settings. This ensures 100%, that the files are only displayed to the assigned person.

FUZZY SEARCH

Hulbee Enterprise Search thinks ahead and knows how to deal with typing or entry errors: Fuzzy Search finds data even with transposed letters and word shortcuts.

VIRTUAL MACHINES CAPABLE

The use of virtual machines has long been a trend! Hulbee Enterprise Search can work with all virtual machines established on the market. VM Ware, Oracles VirtualBox or Microsoft Azure – everything works!

SEMANTIC SEARCH

Hulbee Enterprise Search „thinks ahead“. If you don't remember the exact search term you might not find the document you need. Our search engine makes suggestions based on your entry that could fit the entered term. Through the semantic search, searching will be comfortable and stress free!

EASY INSTALLATION

Even though Hulbee Enterprise Search is aimed at IT-makers and administrators when it comes to the installation, it is still very easy to configure. Even an administrator Junior can set up the software within 1-2 hours, including coffee break.

LANGUAGE INDEPENDENT

The whole world is talking about globalization. Accordingly, documents are multilingual. Hulbee Enterprise Search searches in all languages of the world! With just one click, the language of the interface can also be changed.

Easy integration. Fair price. Safe.

AFFORDABLE COST FOR EACH COMPANY/AUTHORITY

Enterprise search engines usually cost a lot of money. We wanted to put an end to this and are offering an efficient search engine for companies with 20 employees and over. License costs are approximately 425 \$ per employee! For a company up to 250 employees, there are no annual license fees! Thus, we support small and medium business. For example: for an accountant, a lawyer's office or a doctor's office with 20 employees Hulbee Enterprise Search costs a one-time fee of only 8.500 \$, no additional costs!

UNLIMITED AMOUNT OF DATA

Hulbee Enterprise Search is designed for both large corporations as well as for small businesses. According to statistics, data is doubling every two years. Thus, for the search engine the challenge arises to search within millions of documents and Hulbee Enterprise Search masters it with flying colors! Also for hosters with lots of storage data!

INNOVATIVE AND INTUITIVE

Since we already have more than 15 years of experience in document and knowledge management, we have designed our software in such a way that it is easy to understand and intuitive to handle for everyone – even without training. In other words – it is foolproof. Innovation has long been our strength; therefore our software has the best of advanced features: semantic search, Boolean search, artificial intelligence, learning ability, behavior adapted to the user etc.

FLEXIBLE/CUSTOMIZABLE THROUGH SDK AND API

Many companies are very creative technically and want to adapt Hulbee Enterprise Search to their own needs. Like a LEGO System you can adapt our software to your IT needs and expand. Whether Internet or Intranet areas, everything can be linked by API and expanded by SDK!

DOCUMENT PREVIEW WORLDWIDE UNIQUE!

To us, a preview window is not simply a display of a document. Problems occur, if during the search documents with a large number of pages appear. Usually you don't have time to read through it all. Therefore, we have used a technology that summarizes texts according to their meaning. Through this innovative technology the user is able to make decisions a lot faster, plus he saves time!

FORMAT DIVERSITY - IT'S ALMOST EVERYTHING!

In a business there are many creative formats and not every search engine can deal with them. Hulbee Enterprise Search finds almost all the formats in the world - all Office file formats and emails, Open Office files, archive formats (Winzip, Rar...), PDF, pictures (JPG, PSD), media (mp3, mp4, wav), Source Code and Scripting (cs, vb, js) Hypertext files (html, xml, htm) and many more.

Our designer lab has invested over 7'800 hours in user friendliness and software ergonomics to make you feel comfortable!

We are pleased to present you a few extracts of our software.

Ergonomically. Innovative. Intuitive.

Google Search Appliance is discontinued - What now?

Seamless transition from GSA to the Hulbee Enterprise Search Appliance!

Hulbee Enterprise Search offers you not only the replacement of the GSA but also fair prices and innovative software.

Are you as a company or authority affected by the discontinuation of the GSA and are looking for a suitable replacement? This is the right place for you!

We have been developing search tools for many years and are looking after large and small companies. We are also known by our data-safe search engines such as www.swisscows.ch and www.hulbee.com

Data protection and security of our customers are our top priority. Our Hulbee Enterprise Search is superbly tuned to the hardware, so you can definitely rely on our search appliance.

In just three steps, you can get to your search appliance:

Compile the hardware

After consultation with our team, the appliance is assembled as a hardware for you.

Integrate software

Hulbee Enterprise Search Software is adapted to the appliance and installed.

Now you can start

After receiving the appliance, the hardware is connected, indexed and off you go!

Our search appliance provides innovative and robust hardware for smooth work.

Our appliance is modern equipment and a reliable technological solution. For you, we have put together the most powerful and proven components that meet the best modern standards in reliability and performance.

The modular architecture of these servers can be extended further and offers further equipment possibilities, these will be carefully equipped with you.

The employee assignment is organized by the Microsoft Active Directory, so the data security remains.

Questions are there to get answers.

You certainly have questions that are still open. This is perfectly fine!

If you do not ask, you will go on slower.

We have put together some of our customers' questions from the experience and hope to help you with this. If you still have one or more questions, please contact us.

Which formats are supported?

A large number. In a business there are usually many creative formats and not every search engine can deal with them. Hulbee Enterprise Search finds almost all the formats in the world - all Office file formats and emails, Open Office files, archive formats (Winzip, Rar...), PDF, pictures (JPG, PNG), media (mp3, mp4, wav), Source Code and Scripting (cs, vb, js) Hypertext files (html, xml, htm) and many more.

How is security guaranteed?

At the highest level. Security plays a very important role for us; therefore we take the safest precaution in the distribution of rights: Active Directory settings. This ensures 100%, that the files are only displayed to the assigned person.

Semantic and intelligent search?

YES. Hulbee Enterprise Search always „thinks ahead“. If you don't remember the exact search term you might not find the document you need. Our search engine makes suggestions based on your entry that could fit the entered term. Through the semantic search, searching will be comfortable and stress free!

Are datasets limited?

NO. Hulbee Enterprise Search is designed for both large corporations as well as for small businesses. According to statistics, data is doubling every two years. Thus, for the search engine the challenge arises to search within millions of documents and Hulbee Enterprise Search masters it with flying colors! Also for hosters with lots of storage data!

How complicated is the installation?

Simple. Even though Hulbee Enterprise Search is aimed at IT-makers and administrators when it comes to the installation, it is still very easy to configure. Even an administrator Junior can set up the software within 1-2 hours, including coffee break.

Is there an API and / or SDK?

YES. Many companies are very creative technically and want to adapt Hulbee Enterprise Search to their own needs. We gladly offer this possibility. Like a LEGO System you can adapt our software to your IT needs and expand. Whether Internet or Intranet areas, everything can be linked by API and expanded by SDK!

Can the search be done on the Internet and / or Intranet?

YES. Whether Internet or Intranet areas, everything can be linked by API and expanded by SDK! For example you can link the search engine with your website. With Hulbee Enterprise Search you can expand your services infinitely.

What languages does the system support?

Every language. The whole world is talking about globalization. Accordingly, documents are multilingual. Hulbee Enterprise Search searches in all the languages of the world! With just one click, the language of the interface can also be changed.

How long does the installation of the software take?

Quick and easy. Even though Hulbee Enterprise Search is aimed at IT-makers and administrators when it comes to the installation, it is still very easy to configure. Even an administrator Junior can set up the software within 1-2 hours, including coffee break.

What hardware requirements must be met, if I only want to buy the software?

This question can be easily answered. However, there are many aspects in order to answer it correctly. It depends first on whether the software is installed on a dedicated server or on a virtual machine. Also important is the number of documents in the company. Basically, for a quick and easy indexing, the server should be well equipped. You can always send a request to our support. If desired, we will then contact you and advise you in detail.

Is the search engine dependent upon the operating system?

NO, Hulbee Enterprise Search is independent of the operating system. Since many enterprises are using hybrid hardware and software (Microsoft, Apple, Linux), we opted for a browser-based solution.

Can the user access his documents while on the move?

YES, at any time on the road or from home office the user can access his data with username and password.

Which is better: only the search software or the appliance?

If you as a company are about to renew your hardware and are not using a virtual machine yet, we would recommend the appliance. The appliance is designed so that the search software (Hulbee Enterprise Search) is already linked and installed with the hardware. You just have to unpack, plug in and the solution is ready to be used. If you already have a virtual machine or good hardware, we would recommend only the pure software (Hulbee Enterprise Search).

Is it multi-client capable?

YES. But before you use it internally, contact our support or our Business Partners.

Can I test it?

With pleasure! Please contact us so that we can configure the software for you. You can test the software for free for 30 days

Visible benefits for all professions.

Hulbee Enterprise Search meets all business sizes and industries!

Do not accept if your employees waste a lot of time searching for information!

Hulbee Enterprise Search is designed for both large companies and small businesses and offices. With Hulbee Enterprise Search, documents are quickly found by entering a search term. Thanks to modern technology, user-friendly interface and easy operation, employees have control over all documents, work more efficiently and save valuable time.

Every profession is flooded with information!

Doctors

Every doctor has a duty of documentation. Consequently, many new documents are created in a doctor's office every day – medical reports, referral letters, applications and many more. Access to the information is complicated and very time-consuming. Thanks to Hulbee Enterprise Search, this flood of information can be managed and contained. Due to the large range of functions and many configuration options large amounts of data can be managed. Hulbee Enterprise Search gives you a quick overview of the electronic archive – from patient records and index cards to prescriptions and transfers. Through a personal login and password, the confidential documents are safe and protected from improper access. To make the search more effective, all files found are displayed in a preview window. If, for example, a large number of X-rays is found, the doctor can tell if it is the correct picture.

Lawyers

In a law firm many different clients are cared for and their data is securely managed. Projects, investments, group management, risk management and contract management - information and documents from different areas that need to be found quickly and without loss of time. In addition, customer information and sensitive documents may only be viewed by the relevant persons. Hulbee Enterprise Search provides an intelligent search solution which can be adapted to their own corporate structure and is multi-client capable. Depending on requirements, different access rights can be allocated among colleagues and individual documents can be assigned. Lawyers are often on site with the customer, but with Hulbee Enterprise Search documents can also be searched while on the move and in all formats, incl. e-mails and archives. Thanks to the intelligent semantic search, the search is fast and accurate, so no time is lost or wasted.

Our software has been developed for all professions!

Finances

In a company from the financial sector hundreds of files are generated and received daily. With Hulbee Enterprise Search access to relevant data is granted and the contents are processed automatically. Our search solution covers different fields of activity of a modern financial company or department. Contracts, invoices, bank statements, budget planning, various documents, notes and letters can be found quickly and easily. All files and their information are available at any time and while on the move. Hulbee Enterprise Search scans documents across the enterprise and across all locations, regardless of source or format. Hulbee Enterprise Search is flexible and can be tailored to all individual requirements.

Industry

In industry, every day a vast amount of data is generated. Many important documents are hidden on hard drives and servers. Hulbee Enterprise Search is especially tailored to the needs of SMEs – helps with document search and provides relief. The high performance full-text search of Hulbee Enterprise Search and the integrated text summary shorten the search and retrieval times drastically. In addition to the price-performance ratio and the intuitive operation Hulbee Enterprise Search presents you with a quick and easy setup. Hulbee Enterprise Search takes over the entire search without complex installation. Our Search Appliance is delivered configured and ready to use.

IT

An IT company owns mountains of technical documentation. A reliable search solution is essential in this case, and Hulbee Enterprise Search is the ideal solution. Thanks to the extensive analysis functions documents can be searched regardless of the operating system according to the requirements of modern search systems. Various interfaces are available for a complete integration and so Hulbee Enterprise Search can be connected to many applications. Our search is secure, reliable and processes documents quickly. The employees will thus save a lot of manual effort and precious time. Conventional file folders become redundant because with our search solution the required information is found with just a few clicks.

Public authorities

Public authorities must treat confidential information with particular caution. With its enormous scope and yet easy access, Hulbee Enterprise Search fulfills every requirement and is immediately operational. Hulbee Enterprise Search analyzes data from various sources and quickly provides the needed information. Of course, files are displayed according to user profile only, i.e. only if the agent has the appropriate access rights. In the future, more and more correspondence will be exchanged electronically. Hulbee Enterprise Search allows you to search in text documents, HTML pages, emails, PDFs, images and of course even scanned documents. With our search solution the time required for research can be significantly reduced.

Success stories worth hearing.

These are just a few excerpts from our customers, we would be delighted if you become part of it.

Satisfied. Excited. Motivated.

Our customers come from different industries and countries. Everyone has their needs and problems. We are glad to present you an excerpt of our customers, you may find yourself in one or the other project. Ask us, we look forward to hearing from you!

Founded in 1939, Pilatus Aircraft Ltd is the only Swiss company to develop, produce and sell aircraft to customers around the world.

Established in 1986 and headquartered in Romanshorn Brüggli now is well-known with its active social position. Today there are more than 650 employees in this company. And all of them rely on the data security of Swisscows.ch which replaced Google search across the enterprise.

BORN Green Technologies is an IT software and services company based in Zug, Switzerland. Their purpose is simple – to support clients in achieving an effective, efficient and sustainable IT environment by identifying, selecting and developing transformational technologies.

The Center for Continuing Vocational Training (ZbW) is an upper secondary school, which is anchored in Eastern Switzerland. It was founded as an association in 1946 at the initiative of industry, commerce and the public sector. Around 450 teachers work for the ZbW in addition to their main occupation.
